Change Management business Manuel-Malta Employers Association

To whom it may concern,

The Change Management Business Manual produced by the Malta Employers Association is a good reference manual for any company when making certain decisions related to change management. It also goes into detail and includes actions that the company must take at all levels.

It is also a good guide for employers, especially when making decisions and it is a must to read it, especially if you are an employer. Its content is very simple to read and is a collection of information gathered from different companies to produce one document.

Sincerely,

Denise Cortis
Head of HR
