#### **Power cuts Inexcusable - MEA**

MEA has described the nationwide power cuts as inexcusable and stated that the report by Enemalta does not put anybody's mind at rest that such occurrences will not repeat in future. The Association expressed its concern that the power cuts are causing severe problems to business and definitely do not conform with Malta's vision as a centre of excellence. MEA stated that the minister was correct in demanding an explanation for the power failure, but added that any report should be followed by concrete actions to ensure security of supply. Whether it is a result of incompetence, strained industrial relations or an ageing infrastructure, Government can do nothing less than to guarantee a regular electricity supply to businesses and consumers. 'Rather than technical reports, this is what really matters to the public', MEA concluded.
